DETAILED ACTION

Election/ Restriction

Claims 1-23 are pending in this application.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-17**, drawn to a common spacer dual gate memory cell, classified in class 257, subclass 316.
 - II. **Claims 18-23**, drawn to a method for forming a nonvolatile memory array, classified in class 438, subclass 266.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case unpatentability of Invention I would not necessarily imply unpatentability of Invention II, since the device of Invention I could be made by processes materially different from those of Invention II. For example, the first gate dielectric and the second gate dielectric of Invention I can be formed selectively, i.e., without having to perform removing a portion of said first (gate) dielectric at said plurality of space regions as recited in claim 18 of Invention II.

Art Unit: 2818

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tu-Tu Ho whose telephone number is (571) 272-1778. The examiner can normally be reached on 6:30 am - 5:00 pm.
